Professional Experience

Private Charter Operations Executive

Flight Operations | Million-Air Jets Private Limited

July 2025 – Present

- Coordinate daily charter flight operations for **30+ monthly private jet and helicopter movements**, working with pilots, ground handlers, airport authorities, and internal teams to ensure smooth scheduling and execution.
- Monitor live flight movements and support **flight dispatch coordination** from crew reporting to passenger arrival.
- Maintain **operational control oversight** by tracking ATC approvals, slot clearances, and real-time flight updates.
- Liaise with pilots, ground staff, and service providers to ensure operational readiness and seamless flight coordination.
- Manage flight documentation, operational records, and permits while ensuring **DGCA regulatory compliance** and adherence to company operational SOPs.
- Support operations teams during schedule changes, operational contingencies, and live flight movements to maintain on-time performance.

Associate Analyst – Insurance Follow-Up

HealthPrime International Pvt. Ltd.

May 2024 – July 2024

- Managed rejected and denied U.S.-based healthcare insurance claims by identifying denial reasons and initiating resolution processes.
- Communicated with insurance representatives via calls and online portals to expedite claim resolution.
- Applied Revenue Cycle Management (RCM) knowledge to improve claim processing efficiency.

Head of Technical Department

TechBit 4.0 Intercollegiate Fest

September 2023

- Led the technical design team responsible for event branding and digital assets.
- Designed brochures, posters, banners, invitation letters, and event logo.
- Managed the design process within strict timelines ensuring professional event presentation.

Projects

ThriftKicks – MERN E-Commerce Platform

- Developed a responsive e-commerce platform for thrifted footwear using **MongoDB, Express.js, React.js, and Node.js**.
- Implemented core features including product browsing, shopping cart functionality, and payment integration.
- Designed a mobile-first responsive interface to improve cross-device usability.

ramoWatch 2.0 – Anime Discovery and Merchandise Platform

- Engineered a React-based anime discovery and merchandise platform.
- Deployed the platform using Netlify with dynamic updates for anime releases and merchandise listings.
- Currently improving mobile responsiveness and platform scalability.
