Professional Experience

Operations Executive
Million-Air Jets Private Limited, Mumbai — Jul 2025 – Present

- Coordinate end-to-end operational workflows for 25–30 monthly charter movements, managing multiple activities, timelines and stakeholder requirements simultaneously.
- Monitor real-time operational information, verify data accuracy and coordinate timely actions to ensure completeness and continuity of operational processes.
- Manage multiple concurrent requests, schedule changes and operational exceptions while maintaining accurate records, timely follow-ups and effective stakeholder communication.
- Maintain operational documentation and compliance records in accordance with established procedures, ensuring accuracy, completeness and adherence to process requirements.
- Identify operational discrepancies and issues, coordinate with relevant stakeholders and follow established escalation procedures to support timely resolution.
- Coordinate with internal teams, clients, aircraft operators, vendors and service providers, ensuring requirements are clearly communicated and completed within defined timelines.
- Support process-driven activities in a high-pressure environment while maintaining attention to detail, service quality and operational accuracy.

Associate Analyst – Insurance Follow-Up
HealthPrime International Pvt. Ltd., Mumbai — Apr 2024 – Jul 2024

- Managed insurance claim follow-up activities for U.S.-based healthcare accounts, reviewing denied and rejected claims and identifying discrepancies requiring resolution.
- Analyzed claim information and insurance responses to determine denial reasons and appropriate follow-up actions.

- Coordinated with insurance representatives through telephone and web portals to obtain required information and resolve outstanding claim issues.
- Maintained accurate claim records and followed established Revenue Cycle Management (RCM) processes, quality standards and documentation requirements.

Head of Technical Department
TechBit 4.0 Intercollegiate Fest Aug2023 – Sep 2023

- Led a 10-member technical team and coordinated multiple workstreams, deliverables and deadlines for a large intercollegiate event.
- Tracked team requirements, coordinated feedback and managed execution across multiple stakeholders to ensure timely completion.
- Resolved routine technical and production issues through structured problem-solving, prioritization and team collaboration.

Projects

ThriftKicks – MERN E-Commerce Platform 2024 – 2025

MongoDB, Express.js, React.js, Node.js, SQL

- Developed a responsive e-commerce web application with product browsing, shopping cart and payment functionality.
- Worked with structured application data and database-backed workflows, strengthening practical data management and problem-solving skills.

Ramo-folio – Personal Portfolio Website 2026

React.js, JavaScript, HTML5, CSS3, Vercel

- Designed and developed a responsive personal portfolio website using React.js, showcasing projects, technical skills and professional experience.
